II Installation

Remove the top cover and unhook the tether wire.

❶
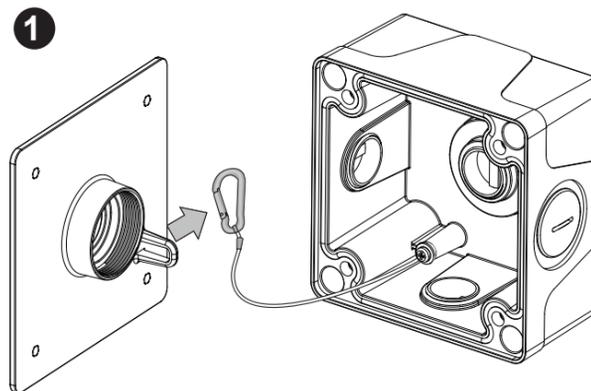

A 3/4" conduit is required for routing the cables with waterproof connection.

❸

Attach the included alignment sticker to a preferred position. Drill holes on the wall and install the junction box. If space behind the wall allows, you may also pass cables through the wall.

❷

Install the cable gland and pass cables through it.
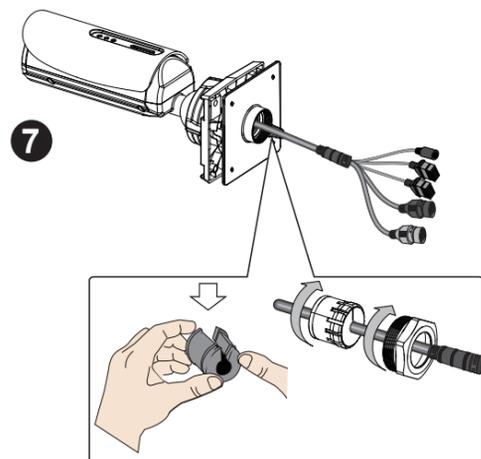

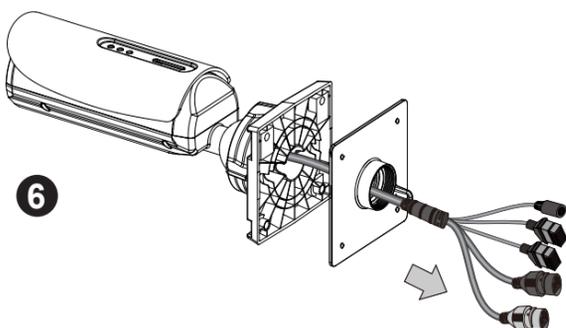

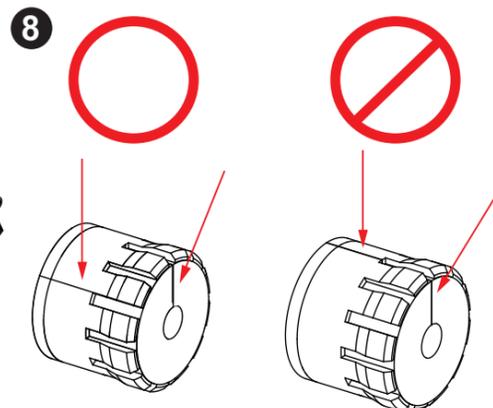

❹

Remove the waterproof cable gland from the top cover.

❺

Install the rubber seal, claw, and sealing nut to the combo cable. Tighten up the sealing nut as shown below.
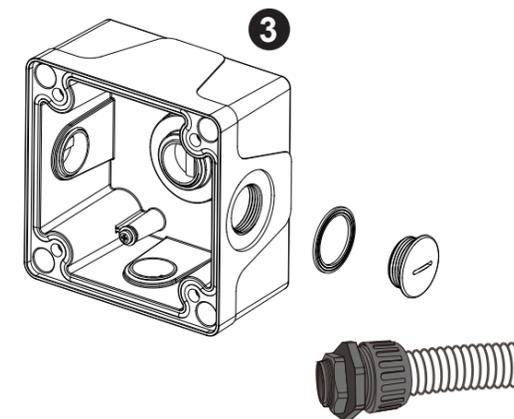

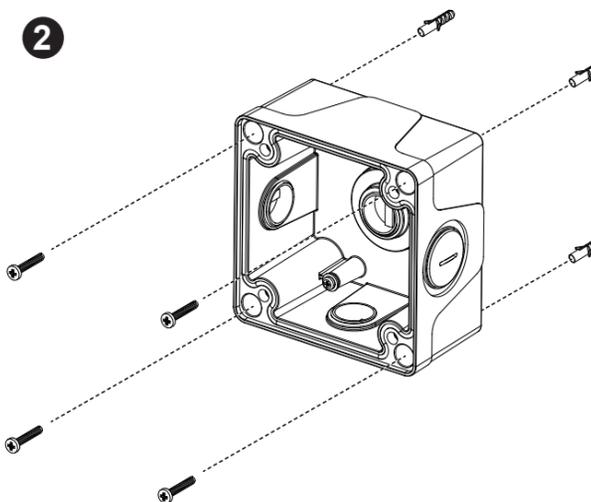

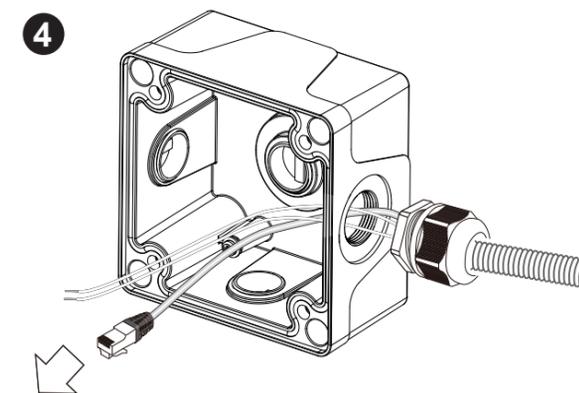

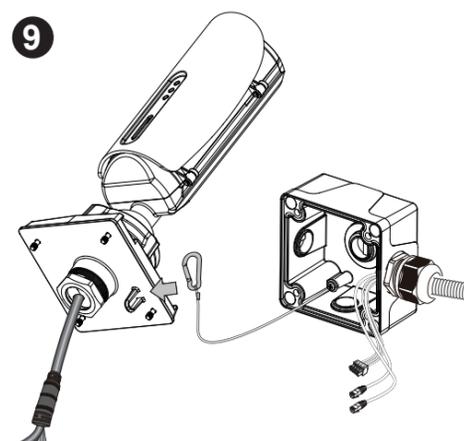

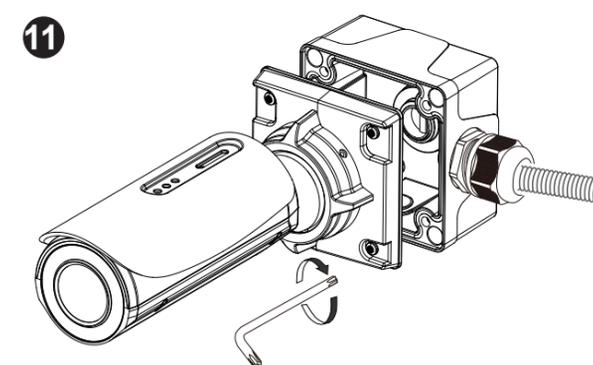

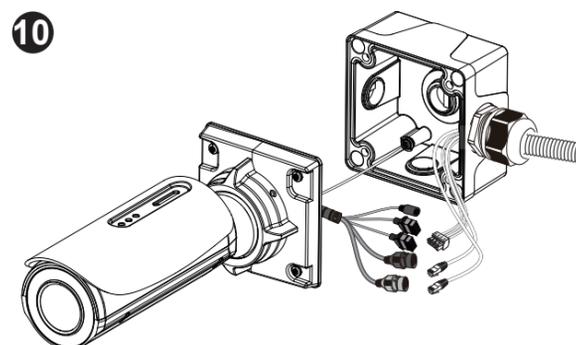

❼

Connect the tether wire between camera and box.

❾

Secure the camera to box using the T25 torx wrench.

⓫

Pass cables through the center hole on the top cover.

❻

Make sure the pre-cut openings on the seal and the claw are not aligned.

❽

Connect cables and all wiring.

❿

Open a live view console and adjust the shooting direction. Refer to the camera's QIG for more information.
