

The affordable companion for Dyslexia

ASSISTING – TRAINING – IMPROVING the comfort of individuals with DYSLEXIA The tool that helps everyone!

It's estimated that around 1 in 10 people are dyslexic, with at least 1 in 25 as severely dyslexic. Dyslexia is a specific learning disorder that affects the ability to process reading, spelling, or writing (or all three combined). Neurodivergence acknowledges that every human is different, meaning dyslexia should not be considered a disease.

At IRIS, we spent much time and resources to create an efficient, affordable, simple and easy to use software for supporting, training, and improving persons suffering from dyslexia. The Readiris Dyslexic 2.0 desktop application is straightforward so anyone can use it. It's efficient, easy to understand, train with, and share with anyone. The application comes with tons of unique features. One of the best is its ability to read loud all types of digital files or papers by highlighting words, at the speed of your choice. With this 2.0 version, we added new features such as font type, size, font color, back ground color options, to enable the best possible environment for each dyslexic individual. Its user-friendly interface and translation tool, among other nifty features, makes the Readiris Dyslexic 2.0 the best tool for Dyslexic kids and adults. Such solution for dyslexic help persons with dyslexia to read, spell, and write well with little practice. Readiris Dyslexic 2.0 addresses all types of dyslexia except dyscalculia (so dyslexia – dyspraxia – dysorthographia – dysphasia – dysgraphia).

Key features

- Intuitive, friendly & simple User Interface for people with dyslexia.
- Ability to read loud all types of digital files, documents or books.
- Option to hide or enlarge both screens—both the original scan and the text screen, which is then editable - This prevents confusion and provides better focus, as opposed to displaying both screens simultaneously.
- Zoom in/out on the text for better readability.
- Adjust the font, the size, the color, and even the background color of the text – also for better readability, adapted to each specific personal needs for better reading. It is also possible to edit the text itself.
- Read aloud entire sentence or repeated words up to your choice.
- Word-by-word reading is also allowed.
- Each word is highlighted in the text as it is read aloud—this is what we call “word by word”—in order to help improve diction.
- Read with your pace, go faster or slower, depending on your own setting.
- Reading speed and volume are both manually adaptable and will be saved as set in the created audio format (.WAV or .MP3).
- Compatible with all Microsoft text-to-speech languages
- Recognizes up to 138 languages
- Easy multiple output formats possible (DOCX – JPEG – MP3 - WAV - PDF) and send directly via Email
- Windows only
